

Subtracting Fractions — Like Denominators

Subtract the numerators and keep the denominator. Simplify if possible.

Grade: 3–4

Difficulty: ★ — Beginner

Problems: 20

Name: _____

Date: _____

Score: _____ / 20

Instructions: Subtract each pair of fractions. Simplify your answer where possible.

1. $\frac{5}{8} - \frac{3}{8} =$ _____

11. $\frac{7}{9} - \frac{4}{9} =$ _____

2. $\frac{4}{5} - \frac{1}{5} =$ _____

12. $\frac{5}{6} - \frac{1}{6} =$ _____

3. $\frac{7}{9} - \frac{2}{9} =$ _____

13. $\frac{11}{12} - \frac{5}{12} =$ _____

4. $\frac{3}{4} - \frac{1}{4} =$ _____

14. $\frac{8}{10} - \frac{3}{10} =$ _____

5. $\frac{5}{6} - \frac{2}{6} =$ _____

15. $\frac{9}{11} - \frac{4}{11} =$ _____

6. $\frac{7}{8} - \frac{3}{8} =$ _____

16. $\frac{6}{7} - \frac{2}{7} =$ _____

7. $\frac{4}{5} - \frac{2}{5} =$ _____

17. $\frac{5}{9} - \frac{2}{9} =$ _____

8. $\frac{9}{10} - \frac{4}{10} =$ _____

18. $\frac{7}{8} - \frac{5}{8} =$ _____

9. $\frac{5}{7} - \frac{2}{7} =$ _____

19. $\frac{10}{12} - \frac{4}{12} =$ _____

10. $\frac{6}{9} - \frac{3}{9} =$ _____

20. $\frac{8}{9} - \frac{5}{9} =$ _____

ANSWER KEY

1. $\frac{1}{4}$

2. $\frac{3}{5}$

3. $\frac{5}{9}$

4. $\frac{1}{2}$

5. $\frac{1}{2}$

6. $\frac{1}{5}$

7. $\frac{2}{5}$

8. $\frac{1}{2}$

9. $\frac{3}{7}$

10. $\frac{1}{3}$

11. $\frac{1}{3}$

12. $\frac{2}{3}$

13. $\frac{1}{2}$

14. $\frac{1}{2}$

15. $\frac{5}{11}$

16. $\frac{4}{7}$

17. $\frac{1}{3}$

18. $\frac{1}{4}$

19. $\frac{1}{2}$

20. $\frac{1}{3}$
